SUMMARY

Computer Engineering student in my **seventh semester** with practical experience in software development through academic, personal, and professional projects. I have worked directly with clients, understanding and transforming their needs into effective solutions. I'm currently working at Alcon doing a part time 1 year internship. My duties include managing UAM, customization, bug solving and optimization of Atlassian and Tricentis tools during the CST timezone.

SKILLS

Programming Languages: Java | Python | C/C++ | SQL | PL/SQL | PHP

Development Tools: Git/GitHub | Canva | Figma | E/R Studio

Libraries/Frameworks: Django | Yii | NumPy | Matplotlib | OpenCV | Dlib | Kivy

Certifications: [Scrum Fundamentals](#)

Languages: Sapanish: Native | [English: advanzed](#) | German: Basic

EDUCATION

National Autonomous University of Mexico (UNAM)

Faculty of Engineering, Mexico City

B.Sc. in Computer Engineering. GPA: 8.7/10

Aug. 2022 – Expected Aug. 2027

Relevant Courses: Data Structures and Algorithms, Object-Oriented Programming, Software Engineering, Databases

EXPERIENCE

DevSecOps Intern

Ago. 2025 – currently

Alcon

Python | Jira | Confluence | qTest | Saviynt | Vera | ServiceNow

- Worked to resolve tickets of various kinds in an enviornment of over 5000 users
- Brought response and resolution time making the DevOps cycle run faster and better.
- Implemented optimizations to the processes making productivity rise across the team.

Backend and QA Intern

Dec. 2024 – Apr. 2025

DocOffice

PHP | Yii

- Identified, reported, and documented issues and areas for improvement in the web application.
- Worked with databases and backend systems to solve client-reported issues.
- Communicated with end users to address concerns and follow up on issues.

Frontend Intern

May 2024 – Aug. 2024

Cibergestión

HTML | CSS | Python | Django

- Developed frontend components for a web application.
- Implemented AI tools for speech transcription and audio analysis.
- Participated in SCRUM ceremonies and agile development practices.

Competitive Programming Club (CPCFI)

Aug. 2023 – Dec. 2023

UNAM

Faculty of Engineering, Mexico City

- Participated in various programming competitions as part of a diverse team.
- Developed algorithmic solutions in C++ under time constraints.
- Collaborated on problem-solving strategies in high-pressure environments.

PROJECTS

Dental Clinic Database | *SQL, SQL*Plus, PL/SQL*

- Designed and implemented a relational database optimized for user requirements and minimal redundancy.
- Used E/R Studio and the extended Chen model to validate and review the design with users.
- Applied business rules using constraints and PL/SQL procedures.

Game Theory Simulation | *C*

- Built a simulation of zero-sum games using game theory concepts.
- Developed a method to analyze rows and columns to evaluate player advantage.
- Demonstrated how any matrix could represent a solvable game under defined conditions.
